Dear Sir

RE: McDONALD'S RUTHERFORD

Just a follow up note following the non slip application to the patio area of our Rutherford store in September, 2004. I wanted to wait until we had been through a period of solid rain so the area could be tested under very wet conditions.

The patio area in some storm activity is very exposed and wet and since the non slip application the surface has improved significantly. Our management staff have tested it under extreme conditions and are pleased with the results.

I am happy with the product and wish you luck in the future.

Yours sincerely

STEVE DAVIS
OWNER/OPERATOR
