	<u>Safe Grip</u>	<u>Metal Stair Nosing</u>	<u>Anti Slip Tapes</u>	<u>Ladder Rung Covers</u>	<u>Safety Checker and Other Plates</u>
Environmental Friendliness	Product is environmentally friendly and due to its very long life expectancy it is less onerous on the environment.	Inserts may require frequent replacements, worn material maybe recycled.	May require frequent replacement and produces non recyclable waste.	Worn material maybe recycled.	Worn material maybe recycled.
Rejuvenation cost	Can be readily done with minimal preparation. Cost of extending the life of the coating is low.	Generally this is not recommended, but if possible the preparation time is demanding. A cost incurred to extend the life of the coating is high.	Worn and torn tapes must be removed, surface has to be cleaned. Cost of extending the life of the tapes is comparatively much higher.	Generally this is not recommended, but if possible the preparation is more demanding. Cost of extending the life of the coating is comparatively much higher.	Generally this is not recommended, but if possible the preparation is more demanding. Cost of extending the life of the plates is comparatively much higher.
