## **Floor Safety Maintenance Program©**

Global Safe Technologies Australia is proud to announce its industry unique Floor Safety Maintenance Program© “FSMP©” for commercial clients. This program is only charged out at the time of the initial anti-slip application and when the floor surface requires anti-slip rejuvenations, up to two years or more, and comes all inclusive at no additional cost to the client.

Why the FSMP© is unique and so important for our clients?

When a slip fall risk is identified, the customer’s relevant department will contact a floor safety specialist company to rectify the problem. This company will do a sample, and then if the sample is satisfactory and the quote is accepted, the company will complete the job and the floor will be slip resistant in line with the relevant Australian standards.

Global Safe Technologies, even at this stage, is different than any other anti-slip company as it will provide the client with an initial Floor Safety Inspection report, where we show the floor’s condition, the condition of the customer’s cleaning equipment, and relevant Australian Standard requirements. Once the customer agrees to our services, we then provide inspections on an ongoing basis, staff training in proper floor cleaning procedures, identifying the correct cleaner to be used, and introduce to the customer our own superior cleaning formula, specifically designed for Safe Solution® treated surfaces.

At this stage Global Safe Technologies will then provide our FSMP© warranty to the customer. This warranty will stay in effect for however long the customer remains on our FSMP©, which can be for the lifetime of the floor surface, and is based on the customer following our recommendations; all to maintain customer due diligence, and to maintain the safety conditions of the treated floor surface. In doing so if an unfortunate slip fall accident should occur, the FSMP© warranty will provide the customer with all relevant documentation showing that they have indeed taken all necessary practical steps, and their due diligence to provide and maintain a safer working environment.

Other companies may provide a warranty; however, this warranty usually is based only on the floor surface slip resistive qualities, and a time period where those slip resistant qualities will not be reduced. After which it is usually up to the client to do everything on their own to maintain the floor, which we would normally provide in our FSMP©.

Global Safe Technologies, after talking to its very large international client base, has identified the need to provide this complete floor care solution – **at no additional cost to the client** – the Floor Safety Maintenance Program©.

**We provide staff training, ongoing written monitoring, ongoing advice, and most importantly, the necessary documentation showing customer due diligence.**

If other anti-slip providers offer any of these above services at all, it will more than likely come with additional costs to the client.

**Toll Free 1300 668 620 E-mail: [info@globalsafe.com.au](mailto:info@globalsafe.com.au)**

*Home Safe, Work Safe, GLOBAL SAFE©*

The Floor Safety Maintenance Program™ Includes:

- Staff Training in proper floor care and cleaning procedures, and assisting the client with having specific in-house safety policies, i.e. wet floor policy.
- Assistance with identifying the correct cleaning chemical to be used, or introduce Clean Step™, our Superior Multipurpose Cleaner, Degreaser, & Sanitizer, formerly known as the Maintenance Solution™.
- Ongoing and regular written Floor Safety Inspection reports and recommendations, which will also include our own in-house Coefficient of Friction “COF” test measurements using the Slip Alert™ device. For those clients that require certified COF testing, Global Safe Technologies will assist them by providing reputable and certified engineers to perform the testing, such as the Wet Pendulum test.
- Valuable Documentation – Warranty Certificate, Floor Safety Inspection reports, and on request an Affidavit in support that the client has followed the FSMP© to monitor the slip fall risk on an ongoing basis.

The FSMP© offers an all inclusive ongoing risk management program to the client, providing complete peace of mind slip fall prevention.

For further information regarding to the FSMP© contact us directly via our Toll Free Number 1300 668 620 or click on [www.globalsafe.com.au/contactus.php](http://www.globalsafe.com.au/contactus.php)
