STAIN-PROOF™ PENETRATING SEALER

What is Stain Proof™

Uses

STAIN-PROOF™ is a penetrating, invisible and breathable sealer that protects exposed porous tile, natural stone, paving and grout from damage caused by water, salts and oil-based stains. Treated indoor and outdoor surfaces become easier to clean, maintain, and keep looking good for longer. STAIN-PROOF™ provides lasting protection for engineering concrete, terracotta tile, cast stone, paving, sandstone, limestone, brick and grout.

Typical applications

STAIN-PROOF™ is suitable for a wide variety of applications, including building facades, floors, walls, swimming pool surrounds, patios, garages, kitchens and entertaining areas.

Benefits

STAIN-PROOF™ is able to repel stains, graffiti and food products – making cleaning easier; non film-forming; able to work without changing the appearance of the surface - keeps the original look; suitable for indoor and outdoor use; able to greatly reduce water uptake and minimise moss growth, freeze thaw spalling and efflorescence; an excellent chloride ion salt screen – ideal for marine and pool areas; highly water vapour permeable – able to breathe so there is no build-up of subsurface moisture, allowing it to dry out; deeply penetrating – protecting against weathering and wearing; very alkali resistant – won't break down in contact with cement based materials, able to seal hairline cracks up to 0.3 mm (0.012 in.) and does not flake or peel.

Warranty

A 15-YEAR PERFORMANCE WARRANTY is offered when applied by an accredited applicator following written instructions. Spills should still be cleaned up immediately to minimise absorption.

Active content

A 50 per cent active content in alcohol.

Pack size

1, 5 & 20 litre steel drums.

Test reports

Resistance to salt attack tests on pavers - BEMAC Laboratories.
Staining liquid tests to ISO 10545-14 - Eureka Tiles.
Coefficient of friction of wet surfaces - BEMAC Laboratories.

Storage

Use product within 12 months of purchase. Keep container tightly sealed, in a cool well-ventilated place. Product is freeze-thaw stable.
