TO WHOM IT MAY CONCERN

The Stamford Plaza Hotel – Auckland, Kabuki Teppanyaki Restaurant, has tiled areas in both its main restaurant and buffet. These tiles whilst attractive had been causing a problem with staff and clients slipping.

We were looking for a product that could make our tiles safe without losing the aesthetic look of the tiles. Global Safe Technologies NZ offered an ideal solution. We decided to go with their product Safe Solution to remedy the problem of slippery tiles. We also decided, as suggested by Global Safe Technologies NZ, to seal the treated tiles with a product called stain proof. By combining these two products we were able to have the surface made non slip whilst also stain proofing the tiles with little or no change to the overall look.

We are very pleased with the overall effect on the tiles and would recommend this treatment to anyone concerned with potential slippery surfaces.

The work undertaken was carried out promptly and efficiently with the provider being very accommodating with the timeframes and work schedules of the restaurant. This enabled the restaurant and buffet to continue business with no disruption to staff or clientele.

We are extremely happy and impressed with the work that they have done for us and would be happy to act as verbal referee should anyone wish to discuss this with us.
